

I strongly support bill 574

While sitting at a red light on my motorcycle with my daughter on the back with me, we were behind multiple cars and a large truck directly in front of us, but no one was behind us at the time. Keeping an eye on my mirror I noticed a car was approaching us from behind very quickly, I made the last second decision to move forward and to the left between the large truck and a stopped car in the left turning lane, that decision could have saved my daughter's life, because the car approaching us from the rear hit the brakes too late and slammed in to the truck that we were just behind. If we were not in the lane sharing space at the time we would have been hit incredibly hard, motorcycles do not have bumpers or crumple zones to protect us from distracted drivers, sharing a lane at a stop light or in traffic can save our lives. Thank you for your consideration on this matter.
