

I support this bill 100% I have been riding for a year now people in cars do not pay attention I have almost been rear ended multiple times at a light on the freeway with rush hour traffic I have been rear ended 3 months into riding and my leg was shattered because the person wasn't paying attention. This helps motorcyclists stay safe while safely moving up out of a dangerous position. As I mentioned before this bill needs to pass please. I have seen to many fellow riders hit because of being in a bad spot and not having a way to protect themselves except for the gear they have which in reality will help to a point but not if someone is going way to fast with not enough time to slow down.
