OREGON
DEPARTMENT OF
ENERGY

CONSUMER PRODUCT EFFICIENCY STANDARDS

Establish efficiency requirements for common products in order to be sold, offered for sale, or installed in Oregon

Contribute toward consumer utility cost savings and greenhouse gas reductions

Are complementary to building energy codes to address resource consumption in the built environment

Include a role for both State and Federal governments

OREGON STANDARDS LEGISLATIVE TIMELINE

2005 – HB 3363

- 11 products
- ODOE provided with authority to create new and updated standards, subsequent legislation required

2013 – SB 375

- 3 additional products

2017 – SB 3025

- Definitional amendment for battery chargers to align with California
- No new standards

2007 – HB 3363

- 6 additional products
- 1 year delay added for ODOE new standards or updates

2015 – SB 20

- Standards effective date clarification
- Cleanup for alignment with other states
- No new standards

2021 – HB 2062

- 11 products (9 new, 2 updates)
- Streamlined process for updating standards under limited circumstances

RECENT RULEMAKING AND ODOE ADMINISTRATIVE ACTIVITY
