

HB 4106 B STAFF MEASURE SUMMARY

Carrier: Sen. Patterson

Senate Committee On Health Care**Action Date:** 02/23/22**Action:** Do pass with amendments to the A-Eng bill. (Printed B-Eng.)**Vote:** 4-0-1-0**Yeas:** 4 - Beyer, Linthicum, Manning Jr, Patterson**Exc:** 1 - Kennemer**Fiscal:** Has minimal fiscal impact**Revenue:** No revenue impact**Prepared By:** Daniel Dietz, LPRO Analyst**Meeting Dates:** 2/21, 2/23**WHAT THE MEASURE DOES:**

Allows person employed by health care facility to practice surgical technology if person is enrolled in or has completed a registered apprenticeship program or obtained a subspecialty surgical assistant or surgical technologist certification. Requires apprentice surgical technologist to be provided adequate direct supervision at all times while performing surgical technology. Becomes operative January 1, 2023. Directs State Apprenticeship and Training Council in coordination with the Bureau of Labor and Industries to study registered apprenticeship training programs in surgical technology, including graduation and placement rates, and submit findings to an interim committee of the Legislative Assembly no later than September 1, 2025. Declares emergency, effective upon passage.

ISSUES DISCUSSED:

- Barriers to hiring surgical technologists for open positions
- Availability of training programs for surgical technologists in Oregon
- Testing and accreditation standards for surgical technologists

EFFECT OF AMENDMENT:

Corrects reference to National Center for Competency Testing.

BACKGROUND:

Surgical technologists are medical staff employed by health care facilities to prepare operating rooms and supplies for surgery and assist the surgical team during procedures. Oregon law prohibits a health care facility from allowing a person to practice surgical technology unless the person: has completed an accredited surgical technologist training program and is certified as a surgical technologist by the National Board of Surgical Technology and Surgical Assisting; has completed a federal uniformed service surgical technologist training program and completes 16 hours of continuing education every two years; or, has practiced as a surgical technologist for at least two years before January 1, 2017, and completes 16 hours of continuing education at least every two years. Health care facilities may also employ individuals as surgical technologists for up to 12 months after completion of an accredited training program, and health care facilities in rural or underserved communities may employ individuals as surgical technologists who are attending an accredited training program.

House Bill 4106 B creates an apprenticeship path for surgical technologists. The measure allows individuals enrolled in a registered apprenticeship program to perform surgical technologist duties under direct supervision and health care facilities to employ individuals as surgical technologists who have completed a registered apprenticeship training program that includes certification by the National Center for Competency Testing.
