

Submitter: Justin Joseph  
On Behalf Of:  
Committee: House Committee On Judiciary  
Measure: HB4075

The problem with this newest bill is that it gives the ability of victims to present essentially any monetary demand carte blanche without a determination as to whether it is reasonable or not, which must always be considered in determining restitution. Simply allowing a presumption that a bill/invoice/etc is legitimate without any rebuttal opportunity is one-sided and not in the best interests of justice and should be viewed with skepticism.
