

Submitter: Philip Carver
On Behalf Of: 350 Salem Oregon
Committee: House Committee On Environment and Natural Resources
Measure: HB4058

To members of the Committee and Staff

I am submitting the official position of 350 Salem Oregon. We support the bill as introduced. It is critical for climate justice for low and lower-middle income household to have air conditioning or heat pumps installed for safety during extreme heat events or for poor air quality events. This is an emergency for many older people and those with medical problems.

Please support this bill and provide adequate funding.

Thank you for the opportunity to provide comments
