

Submitter: Shea Leibow
On Behalf Of: CODEPINK
Committee: House Committee On Revenue
Measure: HB4115

Climate change is creating catastrophic challenges not only in Oregon but worldwide, increasing displacement and conflict across the globe (especially in countries that have contributed the least to the climate crisis). Oregonians deserve to know how much of their \$130 billion in the Oregon Treasury is invested in the immoral, climate-wrecking fossil fuel corporations that are willingly causing climate catastrophe for profit. HB 4115 will give Oregonians a tool to ensure Oregon is investing in ways that match the state's needs and values, from the climate to human rights to the energy transition.
