Committee: House Committee On Environment and Natural Resources

Measure: HB4058

I am writing to express my strong support for this bill. As a member of a family of asthma sufferers, I could not overstate the importance of HEPA air purifiers during low air quality events. I first became aware of this when I resided in MT during the Bitterroot Fire, shortly after being diagnosed myself. I was fortunately provided my first air purifier by that state. It helped me stay alive and functioning until I evacuated. We have seen some of the worst air quality of the nation on more than a few occasions, and can anticipate this will be an accelerating trend. Air conditioners also provide needed protection for persons during heat events and will save lives.
