

Submitter: Bill Harris  
On Behalf Of: self  
Committee: House Committee On Education  
Measure: HB4124

Members of the committee:

I support HB4124 with the expectation that reasonable people with time to do the job can appraise the function of testing in our K-12 schools and recommend intelligent choices.

I was a primary school student long ago. I learn from grandchildren the burden that repeated testing has for them. We should err on the side of a bit too little testing rather than too much of this instrument driven by commercial forces.

Please support HB4124 by encouraging other legislators and yourselves voting for it.

Sincerely,  
Bill Harris
