Committee: Senate Committee On Health Care
Measure: SB1530

Hi, I'm a senior whose daughter and son-in-law have worked very hard to responsibly put themselves in a place where they can provide for a child in the ways that children need. Now after saving to buy a home, paying for college, finding careers that would financially pay for their children they find out there are fertility issues. Meanwhile of course the clock is ticking. The costs of tests, procedures. Invitro fertilization not covered by insurance will put them in a place where it will be untenable. As a parent it has been very difficult seeing my daughters continuous heartache. I pray that there will be some way for her to be a parent. She was even planning to take a second job where they covered this type of insurance. Please help make her and others have some hope that they can become parents.
