

Submitter: William Layman

On Behalf Of:

Committee: House Committee On Revenue

Measure: HB4115

It is very clear that Oregonians especially those who are under PERS need to know where the state is investing it's money given that investments in fossil fuels will assuredly lead to more CO2 in the atmosphere which will push the planet toward catastrophic changes. Having transparency in the state's investments is the only way to assure us that our government is working to stop global warming.
