Measure: HB4142

I fully support any measures that allows protection (via Class C felony legal measures) of ALL hospital staff from the violence that is too prevalent. It is about time the world stops abusing nurses (mostly women of course) especially our ED colleagues in particular. People must take responsibility for their own actions: good and bad, regardless of the decisions that they might of made prior that yield such undesirable behavior.

Thanks for any help you can give to this matter.
