

Submitter: Megan Esler

On Behalf Of:

Committee: House Committee On Health Care

Measure: HB4052

Health care providers in other communities have been trialing these sorts of vans and have found they are met with enthusiastic and positive reception, especially from communities of color who may be very suspicious of the established medical profession, given some unfortunate historical incidents. We need many more ways to address racism as a public health crisis (which the CDC has finally recognized as of last year), but this is a great and immediately effective way to begin.
