

Submitter: Scott Steckley

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1521

Where will state interference in local school board business end? What's next, defining the terms of employment between private companies and individuals? The State has no business defining the terms of employment between two parties when neither is the State itself. Period, end of statement. To those boards that would like to retain local control if this bill passes I would suggest immediately firing your superintendent and use existing staff and the board to take over their responsibilities.
