

Submitter: Darlene Sprecher

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

More and more people are moving to Oregon which means more and more people are using Oregon's rivers for recreation. We have all heard it Oregon is being "loved to death" and the Willamette River is no exception.

More & larger boats are producing waves that are disrupting the life cycle of all creatures that call the river and it's shoreline home.
