

Submitter: Reta Vining
On Behalf Of: Citizens and consumers
Committee: House Committee On Business and Labor
Measure: HB4002

HB 4002 was designed by first year inductees. It does not take a rocket science mentality to understand and execute farming for different crops and supplies that make farming productive. One solution does not work. It must follow the laws of nature not laws of congress. Improve the answer to the problem congress created by its interferences. No to HB 4002 and let farmers do what they need to do to do their job. Nut out.
