Committee: House Committee On Human Services

Measure: HB4079

I disagree with a state tax for low income. We as citizens need to stop enabling the homeless and drug addicts. I agree we have a homeless problem we need to motivate them to work, not give them money to support bad habits and poor choices. Most of the homeless have mental health issues and are addicted to drugs. Let's fix the mental health system and drug problem. Make drugs illegal again. There are jobs out there for most of the homeless to work instead of panhandling on the streets, stealing or the government giving them money.

This bill does not and will not help the low income. Let's help them make better life choices.
