

Submitter: David Olongaigh

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1567

We need to support this bill. The CEI hub is an enormous environment risk to one of America's greatest rivers and the ecosystems dependent upon the rivers health. This facility is a substantial seismic risk of failure and contamination, destroying a river and leaving a State and its citizens without critical fuel resources vital to recovery. Please support this Bill.
