

Submitter: Bill Harris

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1567

Members of the Committee:

I live in NW Portland. The possibility of explosion and of fire from malfunction of a pipe or a large or small tank has been a continuous threat from usual activities. It is a

major threat with occurrence of the earthquake predicted certain for our area within frighteningly short of years, maybe 50, maybe 75.

This situation demands that concern for human death and for immense river contamination be given consideration before consideration for preserving the fuel supply.

Please strengthen the earthquake resistance and pass SB1567.  
We need your responsible help.
