

Submitter: Betty Miller

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

How can a bill like this ever be considered without voter approval. A 750.00 debit card to spend with no restrictions at tax payers expenses. I don't do drugs yet you expect me to pay for other people's drug addiction. I didn't have children until I could afford to pay for them, yet you expect me to pay to raise other people's children because there to lazy to work. We already pay taxes to the state for welfare. Our registration tags have doubled in price. When I go into some stores or fast food restaurants they are charging me a sales tax. When I question that they tell me it is because they are being charged a corporate sales tax. It's being passed down to the people in oregon. The people in Oregon have voted down a sales tax over and over again. With the democrats in charge the homeless population has skyrocketed. They just keep taking more and more of our money and solve nothing. Also who has the right to decide what a luxury item is! I've worked all my life for what I have. I've earned it. I should not have to pay for people I'm not responsible for. They already get welfare, and housing at tax payer expense. Leave the HARD WORKING people of Oregon alone.
