

Submitter: Deborah A Boone  
On Behalf Of: Self  
Committee: Senate Committee On Energy and Environment  
Measure: SB1567

I strongly support this bill because it addresses and provides for safe fuel storage and location in all areas of Oregon. I worked on a similar Bill associated with the Oregon Resilience Plan in 2013. Our rural areas need to have a supply of fuel safely stored within close proximity of population centers. Currently about 2% of fuel tanks are considered safe in the case of a seismic event and even then there will be failures especially if we experience the 9.0 Cascadia Seismic event. Please also schedule this important bill for a work session. Thank you.
