

Submitter: Michaela McCormick

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1567

I urge you to pass SB 1567 as a step toward protecting Portland residents against the catastrophic effects of seismic events occurring at or near oil terminals such as Zenith Oil in NW Portland. The highly toxic tar sands oil they store and transport can easily catch fire when the tanks and rail cars containing it are disrupted, contaminate a large area of NW Portland, and threaten human life. This bill is the very least we can do for our health and safety.
