

Submitter: Jazmine Farless

On Behalf Of:

Committee: Senate Committee On Labor and Business

Measure: SB1549

Doing this will force myself and I think many other health care workers to find employment in a different field other than healthcare. Paying bills right now is a struggle as is let alone inflation and the price of everything going up. We risk our lives and health physically and mentally doing a high stress job and we 100% deserve to be compensated for it. Agencies are a wonderful thing we go in and help facilities that are short staffed and hit the ground running doing what we can for the patients and the facility to remain running smoothly. Please please take this into consideration. Many of us are barely getting by as is.
