

Submitter: annie capestany

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1567

When i moved to Portland I immediately started worrying about the bridges and earthquakes. At that point i did not know about the CEI hub. But now, as a NET leader (Neighborhood Emergency Team) and an environmental activist, i am all too familiar with the dangers of the CEI hub. I do not want the Willamette to become a river of fire due to an earthquake. I don't want to breath in that smoke. And i definitely don't want the BIPOC people and low-income people who live near the CEI to suffer due to lack of preparation by the gas companies.

Please support SB1567 which would require seismic vulnerability assessments. Even better, please amend the bill to clarify that as part of their assessment, companies must demonstrate being in alignment with state policies such as the Climate Protection Program and SCR17, the Environmental Justice Framework.
