

Submitter: lewis mccoy

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Please, please, please stop this insanity! The vocal few continue to try and chip away at families' enjoyment of the river and to recreate in ways that have not been shown to decrease safety, erode banks, harm wildlife, or cause property damage. Just because these vocal few toss everything and the kitchen sink into the argument, it does not mean that these are scientifically supported arguments. They just plain don't like tow sports and they want to turn the entire river into paddling only. Please don't continue to do down the road of year-over-year restrictions as is happening predictably over the past few years. Enough is enough. Please stand for families against these loud, but very few, voices. It is time to stand up for the rights of those who prefer more athletic and exciting water sports. Help us!

Thank you!!!

Lewis McCoy
