

Submitter: Mark Darienzo

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1567

I strongly support SB1567 that would require fuel facilities in the CEI Hub in the Portland area to submit to an independent seismic assessment by June 2024. Eventually we need to transition these facilities away from liquefaction zones and phase out dangerous fossil fuels completely. As we have seen in other parts of the country, taxpayers should not have to pay the price for irresponsible practices by companies who do not care about the environment.

Thank you
