

Submitter: Craig Steinfeldt

On Behalf Of:

Committee: Senate Committee On Labor and Business

Measure: SB1549

This bill will cause a mass exodus of essential workers in the state of Oregon. As temporary nurses we have to pay for two residences, we are away from our family, exposed to potential illness, this bill will cause a mass exodus of essential healthcare workers in the state of Oregon. Covid has made us all tired and this will only add additional stress to an already stretched workforce. A good solution would be for hospitals to pay nurses what they're worth. This bill will not solve any problems it will only create more.
