

Submitter: Robert Knight
On Behalf Of: Express Employment Professionals
Committee: Senate Committee On Labor and Business
Measure: SB1549

To whom it may concern

As an owner of a staffing company for the past 15 years and over 25 years in staffing, i can not be more opposed to a potential legislation as House Bill 1549. Our sole business is to identify, evaluate, and present qualified candidates for critical positions with our customers. i find it fundamentally wrong for government to set "caps" on the staffing industry medical or non-medical pricing. Our industry provides hope, employment and makes significant investments to do so. Our industry also takes on significant liability in doing so.

Profitability should not be mandated by government, just as government should not be there to save a business that loses market share and profit. Medical Staffing companies provide a critical resource ; patient care and comfort. Putting CAPS in place is wrong not only for the staffing industry, but for all businesses.
