

Submitter: Patty Sherin

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

Every single pilot program that gives direct cash has shown that it improves mental health. The only people who do not return to work are mothers with new borns and those returning or attending school. The CTC is a perfect example of how people use cash to pay for housing and food. Please pass this law immediately and help your constituents. People are suffering and you can make a difference with this one law to improve people's lives.
