

Submitter: Loren Gramson

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

It is inconceivable to me that the state of Oregon is even considering this bill! We have people flocking to Oregon for its handouts already, this bill would most certainly mean a huge influx of people looking to "mooch" off the hard working citizens that remember what the great state of Oregon used to be.

If you think passage of this bill will reduce the "homeless" situation, better think again. This will create even more issues for Oregon that already can't be taken care of by our so called governor.

Please dump any thoughts on this bill, it will only further reduce peoples willingness to work and take care of themselves more, and it will create a whole new welfare system.

Have you even considered the impact on those businesses desperately trying to hire people? You'll see more help needed signs than ever before!

Respectfully,

Loren Gramson

Warrenton, Oregon
