

Submitter: Michael Follett

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

This bill is ridiculous! I'm not much of a boater, nor do I own a boat, but one of the better things to do in Oregon is enjoy time on the water with friends and family! There's no damage being caused by these boats, especially for those responsible boaters who understand their vessel and where they are towing! There is plenty of educating that goes into buying wake boats and vessels over this limit and boaters should not be penalized by people who make up a list of negative reasons with no merit. I fully oppose this bill.
