

Submitter: Melissa Katz-moye

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

I support SB 1589! As a frequent recreational user of Oregon's waterways I have seen firsthand the impacts that large boat wakes can have on the environment, from shoreline degradation, to fouled waters used by fish and other aquatic life, to the danger imposed on non-motorized watercraft. Speed limits do not seem to be enforced and this can pose a great threat to kayakers, canoers, SUPs, and other small craft.

Please support this bill!
