

Submitter: Antoinette Lopes

On Behalf Of:

Committee: House Committee On Environment and Natural Resources

Measure: HB4080

Wolves are a vital part of our ecological system. We must do all we can to protect them especially given the fires we have endured and continue to see getting worse every year. Wolves can help restore our forrests and rivers which is beyond important in order to help reduce and improve future fires. Please, it is imperative that we do not kill them and instead do what we can to help them.
