

Submitter: Alison Cole

On Behalf Of:

Committee: House Committee On Judiciary

Measure: HB4131

I am a community member concerned by crowd control tactics used by city, county, state and federal law enforcement agencies in Oregon. I'm concerned about it enough that I sat through every work session and public hearing for HB 2928 last year, testified many times, and ended up falling a month behind on work.

In this new bill law enforcement agencies are asking to make clarifications on the previous one passed into law. I've decided to make quick work of this for you. Here are the clarifications: throw your chemical munitions in the dumpster and listen to your communities. Stop wasting our money on wacko paramilitary trainings and spend time building trust with the people you are sworn to protect.
