

Submitter: Joseph Blowers

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

I love to visit the Willamette River. I have canoed the length of the river twice and have gone on numerous other canoe outings on the river. It is a treasure to have it so close and accessible to so many. Large wake boats present a real threat to the health of the river, causing erosion and disturbing wildlife. They make using the river difficult for other users. I urge you to pass this bill. Thank you.
