

Submitter: Scott Parnell

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Please do not further restrict our family activities on the Willamette river. Our manufacturing business supplies components for the boating community. We employ 32 skilled workers with living wage jobs. This bill will directly affect the user group that keeps our doors open.

I am disappointed that the rights of a few affluent waterfront homeowners are being allowed to threaten the rest of us who enjoy this wonderful resource. After all, it is a public resource and should be treated as such.

My family and friends spend many days on the Willamette during the summer. Please don't take these experiences away.

Thanks, Scott Parnell
