

Submitter: Rick Epp

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

Dear committee,

I am asking that you oppose this bill. Renewable diesel fuel supply is very limited and expensive a problem that this bill does not address. Before Oregon takes this risky step in removing critical fuels from the market, we must better understand Oregon's opportunity for new and emerging fuels and technologies that can ensure Oregon remains economically competitive.

We simply do not have the Renewable Diesel supply and infrastructure for a fuel transition of this size and magnitude.

Please oppose this poorly conceived bill.

Respectfully,

Rick Epp.
