

Submitter: Patricia Backsen

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

Once again, Oregon is getting the cart before the horse. Switching to bio-diesel instead of regular diesel would be an incredible hardship for farmers, truckers, and the general population as our food sources will continue to become more expensive. Oregon can't grow enough crops due to a shortage of water. We would have to get our bio-diesel from out of the state. I believe that the Oregon Legislature should work on mitigating the severe consequences to our economy, that has happened the last couple of years due to COVID, and not putting another financial burden in front of Oregonians!
