

Submitter: Mary Graybeal
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: HB4141

I strongly oppose this bill! Oregon's economy relies on the use and availability of diesel fuel. I am in shock that such a bill is even being discussed when there has been no research or steps in place to better understand the opportunities for other new energy or technology. It's almost like the current legislation is determined to set up our state and residents for failure. Things usually don't come out right when you put the cart before the horse and that's what this bill is doing! Businesses are leaving the state already over the cost of doing business and taxes, now we would be adding another reason. One more thing is that I don't understand why Oregon's current legislation keeps focusing on these bills that would immediately hurt farmers, truckers, and anyone else that is trying to make a living by getting food and supplies to our residents. It takes time and is a lot of stress to spend writing testimonials and voicing our concerns that seem so simple yet Oregon's leaders DONT GET IT! I oppose this ridiculous bill!
