

To the state of Oregon,

Why are you, the people we vote for, trying to make it hard for the farmers in our state? We are the stewards of our beautiful state. We are a small farm raising cattle and hay. We have a serious suggestion. If you represent a city, go spend a day or two on a farm. It is almost spring. That mean's fertilizing the hay fields. Last year fertilizer was roughly \$300 for a ton of triple 16. This year it is \$999 a ton. How are farmers supposed to afford that? The current trend of the state is anti-farm. We are barely making ends meet. Our way of life is being destroyed. Because of "progressive" democrats who are short sighted and can't see beyond their inflated ego.

Don't you people realize we need diesel. Where do you think your food comes from, or your packages from Amazon.

Very frustrated,

Shellie Huntington
