

Submitter: Kelly White

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Hello,

I am against the proposed legislation. It is not based on fact or actual scientific studies of the effect of wake boats on the Willamette. It is not equitable. It is not enforceable. It will lead to overcrowding and unsafe conditions in other areas. This stretch of river is already highly regulated. Please don't make it more difficult for Oregon families to get outdoors and enjoy a river that should be shared by all.

Thank you,
Kelly White
