

Submitter: William Tufts

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Very opposed to this bill. This topic has come up repeatedly over the last few years. You all know the facts. The idea that you are entertaining this is silly. Mother nature and homeowner mismanagement of riverfront properties are the leading causes of erosion by far. The Newberg Pool is already highly regulated. Nothing else needs to be done. Please vote NO on SB 1589.
