

Submitter: Jerry Mann

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

This bill seems to be absent the reality that our economy at present, requires diesel fuel for the trucks, buses, cars, fire engines, tractors and other engines that make our system work. To outlaw the very thing that is required to "fuel" our way of life is short sighted and puts Oregon at an extreme economic disadvantage with other states and countries.
