

Submitter: Tony Jenkins

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Subjecting only towed water sports enthusiasts to a weight limit is overtly biased. A 5,000-pound fishing boat can produce a similar wake to the same size tow boat. Furthermore a 15,000-pound cabin cruiser that produces a wake far greater than any wake surfing boat can still operate freely under this legislation.
