

Submitter: Joe Pfleiger

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

OPPOSE SB 1589 – My family has used the Newberg Pool waterway to safely perform water sports for the last 25 years. These new proposed rules will eliminate all water sports boats in production currently of obtaining a towed water sports permit. There is not evidence that boats are the major cause for erosion in that part of the river. The raising of the water level by the dam is the major cause of erosion on this water way. We already have a very limited area for wake surfing and it has been functioning as intended. The major issue is rules need to be enforced on the water way. This body of water is already one of the most regulated water ways. Please leave it the way it is with increased enforcement of the current regulation.

Thank you,  
Pfleiger Family
