

Submitter: Robert Replogle

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I oppose this bill and the ban on Diesel fuel sales, Oregon already has programs in place to incentivize renewable transportation power. This seems to be another deliberate slap in the face to Oregon farmers, loggers, and truckers. Banning diesel fuel will have a negative effect upon the economy and upon the livelihood of rural Oregonians. This bill completely overlooks the fact that there are already renewable biodiesel options available that could be expanded upon as well.
