

Submitter: Sherry Vosburg

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

This bill is ridiculous. Our state is known for agriculture. Why do we keep hitting the farmers right where it hurts. Anyone with an awareness of what this would do to our state obviously grew up in the city and has no clue the extent that diesel is used to harvest and keep farms running. Diesel engines have to run clean, to begin with, admissions are no different than gas. Diesel provides better fuel mileage, stronger engines that are more efficient. Diesel engines last longer as well because they are serviceable. Before you attack farmers take a hard look at what fuel the military uses. Correct that and we can talk.
