

Submitter: Nina Phillips

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

Oregon already provides incentives and regulations to drive more renewable transportation energy sources into Oregon.

In 2015, the Oregon Legislature passed the Clean Fuels Program that, through a regulatory framework, incentivizes the sale of renewable diesel.

Pursuant to the Governor's Executive Order 20-04, the Department of Environmental Quality is already considering a rule that would more than double the clean fuels standard and make fuels like Renewable Diesel even more valuable.

This country is already having problems with getting goods to the marketplace without taking diesel fuel away from the trucking companies. We need to make it easier to live our lives without making it harder on the companies supplying the products that we need.
