

Submitter: Bryan Schmidt

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

I oppose 4141. I use diesel. Gasoline engines are wimpy for providing the torque needed to pull heavy loads, and wear out under heavy torque when transporting crops and equipment with my pickup-truck. Diesel engines can handle the torque no problem. What are you thinking? Plus the ethanol added now is destroying my fuel pumps. Stop messing with my diesel. I oppose HB 4141. Thank you.
