

Submitter: Paul La Follette
On Behalf Of: Farm Bureau
Committee: Joint Committee On Transportation
Measure: HB4141

Dear Legislators

The state of Oregon is using monumental bad judgement on its behalf. While trying to ban diesel fuel you are only harming everyone in Oregon. Bio fuels must be at the same or lower cost and availability as regular diesel. Accounting for less than 10% of fuel sales. Now is not the time. Bio fuels would have to meet or exceed production and directly replace diesel at the same or lower cost which is not the case.

All goods and groceries along with every store item and commodity must be trucked in and rely on trucking from beginning to end. All family farms ranches have tractors trucks machinery and equipment that rely on diesel fuel

Unless you want to destroy peoples lives and pockets books. Do not pass this bill HB 4141 is a huge catastrophe that is completely avoidable and unnecessary

Support family farms and ranchers. Not special interests and agendas.

Use your brain and common sense

Vote No on HB 4141

Farm Bureau Board member

Paul
